PORTFOLIO CASE STUDY / DATA ANALYST

CUSTOMER BEHAVIOUR DASHBOARD

A RECRUITER-READY WALKTHROUGH OF A DASHBOARD THAT TURNS CUSTOMER DATA INTO A FOCUSED COMMERCIAL STORY.

The project turns a messy customer view into a decision-ready readout

The dashboard brings the commercial signals into one place, then lets the viewer narrow the story without losing the context.

One interactive view

Customer volume, rating, purchase value, category performance, subscription status, gender, and age group.

A scenario recruiters can follow

Click through filter scenarios instead of reading a static chart collage.

Made with GAMMA

02 / FILTER SCENARIO

The active filter set narrows the story to a real commercial segment

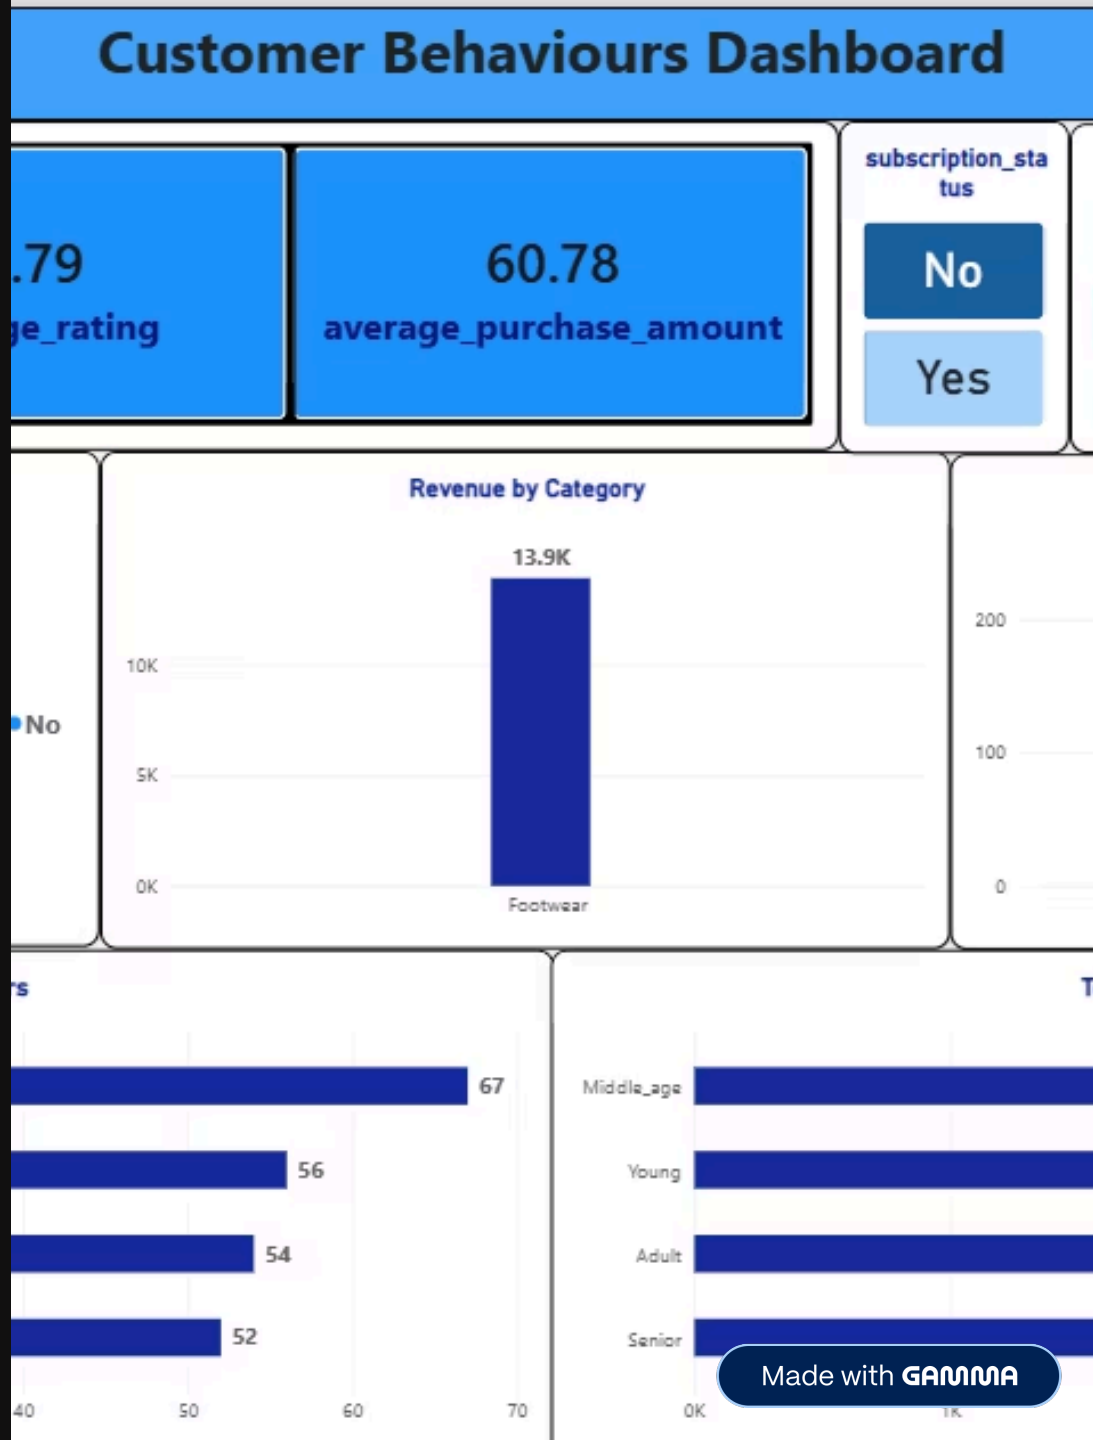

Every KPI and chart on the screen updates around this selected slice.

No **Footwear** **Male**

GUIDED CUE: CLICK SUBSCRIPTION, CATEGORY, THEN GENDER TO REVEAL THE SCENARIO.

Return to overview

Next: read the KPIs

03 / SEGMENT SNAPSHOT

The segment contains 229 customers with a 3.79 average rating

The filter story resolves into a compact commercial snapshot: a defined audience, a clear experience signal, and a measurable purchase baseline.

229

CUSTOMERS

3.79

AVERAGE RATING

60.78

AVERAGE PURCHASE AMOUNT

Made with GAMMA

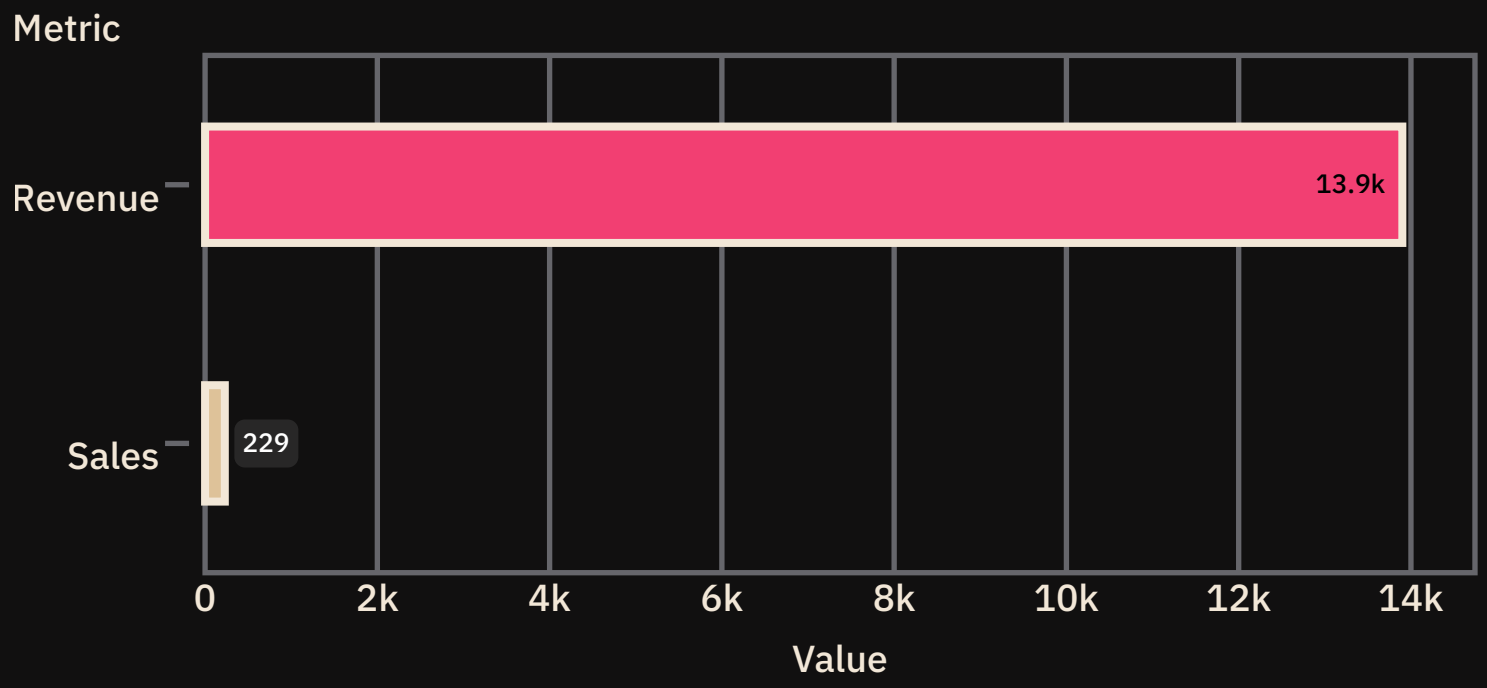

Footwear is the only visible category in this filtered view

The selected segment makes the category readout unusually direct: visible customer count and sales volume align.

13.9K

REVENUE

Footwear accounts for the visible revenue in the active segment.

Made with GAMMA

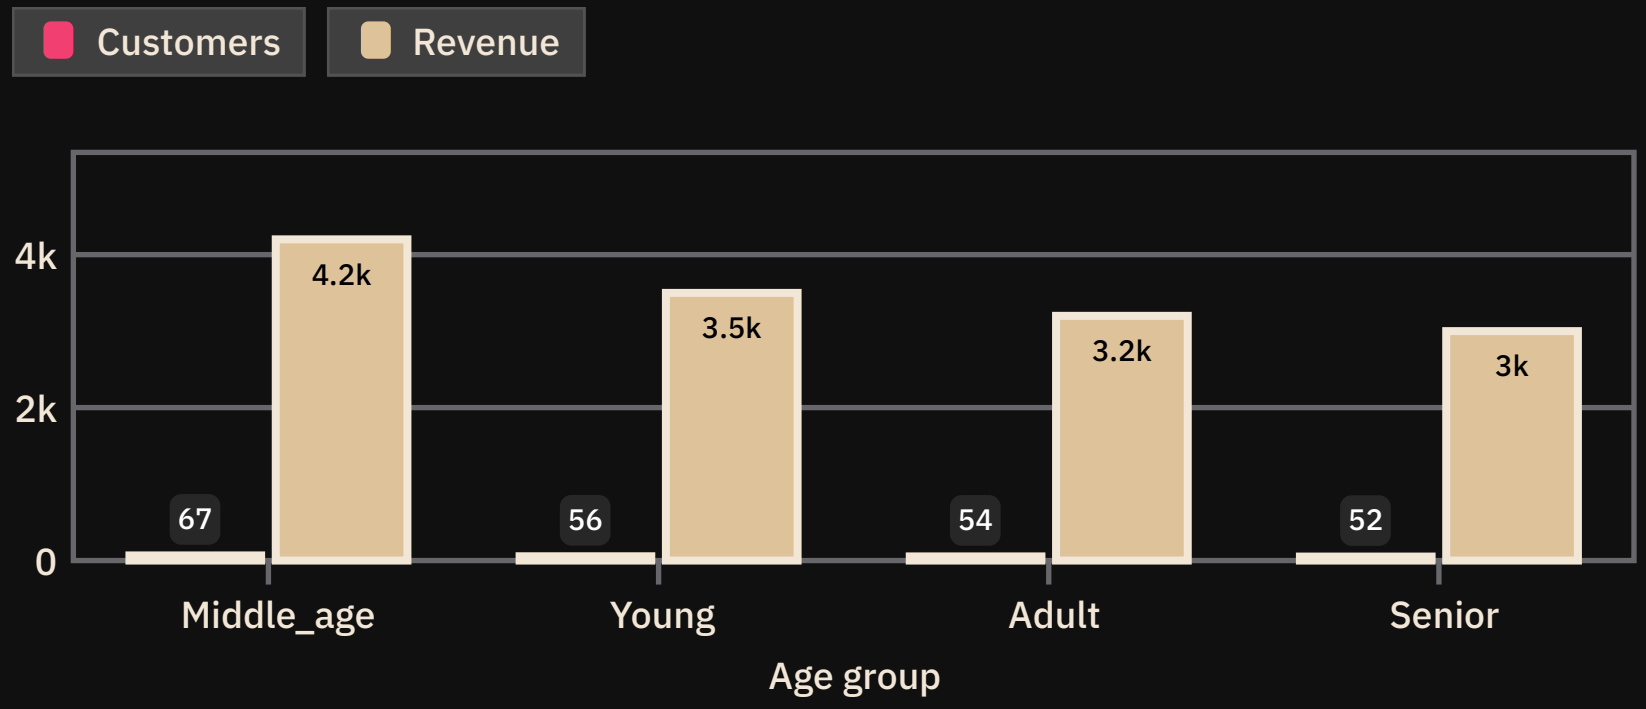

Middle-age customers lead both volume and revenue

The same age group leads on both measures, giving the analysis a clear cross-chart interpretation.

67

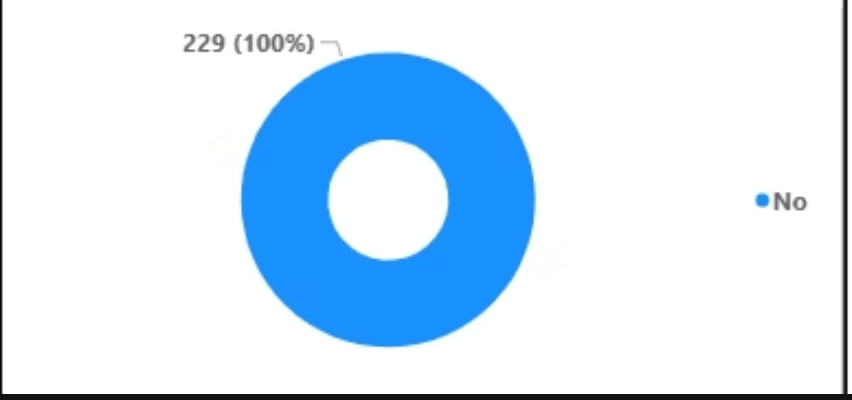

MIDDLE_AGE CUSTOMERS

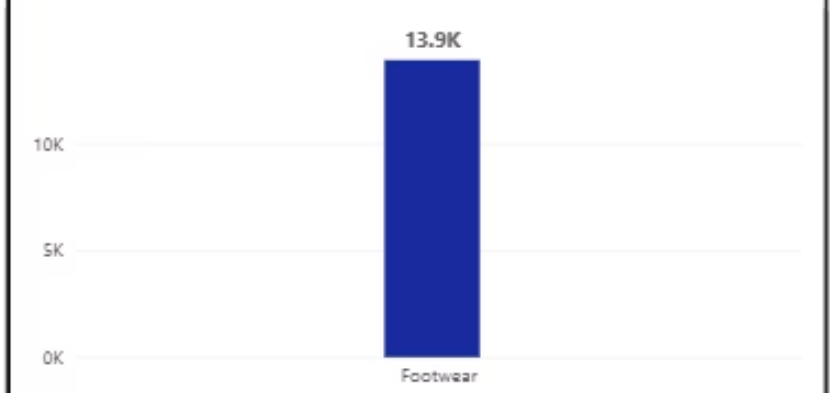

Highest customer count in the selected segment.

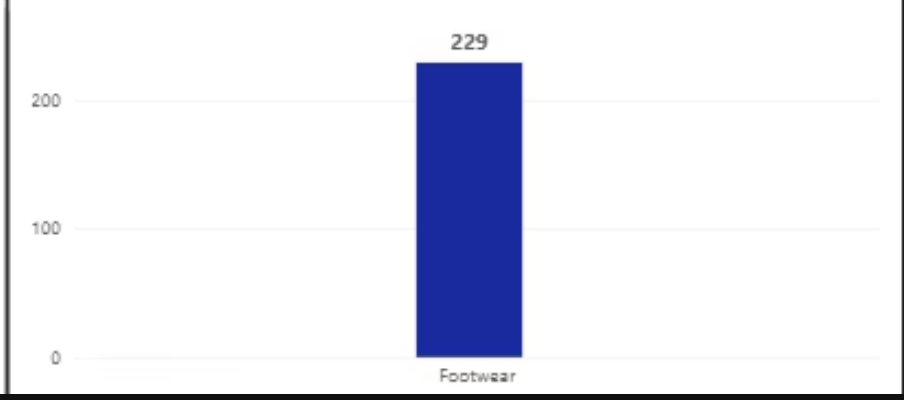

AGE-GROUP PERFORMANCE / CUSTOMERS AND REVENUE

06 / GUIDED DEMO

The strongest interaction is a guided filter story

Overview | Footwear | Male | No subscription | Compare

STEP 01

Start with the full customer view.

Establish the dashboard context before narrowing the audience.

Next cue: click Footwear.

Reset to overview | Next: analyst skills

What this project demonstrates as a data analyst

01 **Translate raw customer fields** into a readable dashboard structure.

02 **Choose KPIs** that connect customer volume to commercial value.

03 **Use filters** to move from broad reporting to a specific segment.

04 **Compare multiple views** before making an insight claim.

05 **Present analysis** as a story a non-technical stakeholder can follow.

Made with GAMMA

THE DECISION PATH IS VISIBLE

It is not only a collection of charts; it is a guided analytical experience that connects filters, KPIs, category performance, and age-group patterns.
